RE: Diploma in Management, Full stack Development

Respected Sir/ Madam,

UI/UX Developer with 1 year of professional experience at Cre8IOT, specializing in building responsive, user-centric web applications. Proficient in modern frontend technologies including React, Next.js, and Svelte, with a strong ability to translate design concepts into scalable and high-performance interfaces. Experienced in creating clean and intuitive user experiences using Figma and Adobe Photoshop, alongside deploying production-ready applications using Vercel.

Possesses a solid foundation in Information Technology (currently pursuing a Bachelor's degree, Year 2), complemented by hands-on experience in frontend development, API integration, database management (PostgreSQL via Supabase and Neon), and performance optimization. Familiar with version control using Git and GitHub, as well as data visualization tools like Power BI.

Brings a balanced combination of design sensibility and technical execution, with strengths in debugging, CI/CD practices, and delivering efficient, maintainable solutions. Continuously improving skills in modern web development while contributing to user-focused, business-driven digital products.

Thank you for considering my application.

Sincerely,

JEEVA SULOLOGAN

EDUCATION

OPEN UNIVERSITY MALAYSIA

Bachelor Information of Technology (2nd Year)

SPECTRUM INTERNATIONAL COLLEGE OF TECHNOLOGY - 2023

Diploma in Management (3.05 CGPA)

SMK TOK PERDANA – 2019

Satisfactory Results
